RE: Stocking of channel catfish in Lower Bolton Lake

Dear Mr. Aarrestad:

On behalf of the Town of Bolton, I am requesting that Lower Bolton Lake not be stocked by the DEEP with channel catfish this year. We understand that DEEP was proposing stocking at a lower rate this year. However, based on public input, we are seeking DEEP's help again by not stocking the lake. This will permit continued study and analysis by our consultant George Knoecklein.

Our efforts to work together have been beneficial to improving the conditions of Lower Bolton Lake over the last couple of years. Our continued cooperation is important to the lake and our community. Please feel free to contact either Administrative Officer Joyce Stille or myself if you have any questions or wish to further discuss this issue.

Sincerely,

Robert R. Morra
First Selectman
